various
packaging
configurations,
display cards and
point-of-sale
presentation
options.

Name	CRAFTBOX
Description	907 - DB

Name	EXPORT
Description	1 Dozen

Name	P.O.S. DISPLAY
Description	907 - POS

The history of OKAPI pocket knives began in Solingen, Germany 115 years ago.

In 1902 a new species of buck was discovered in the then Belgium Congo which was named OKAPI.

At the very same time a new range of pocket knives was developed at the Solingen factory to mark this occasion, the new knives were christened OKAPI.

In 1988 the Trademark was purchased, a factory set up in South Africa, the OKAPI range was now manufactured and distributed from South Africa.

The basic design of the iconic 907E lock back knife, carbon steel blade and resin impregnated veneer handle has hardly changed over the years, and remains a firm favourite around the globe.

The OKAPI range includes the “Big Sable” “Medium Banana” “Small Flat” and “Biltong Knife” all in Stainless Steel.

OKAPI has grown to include a range of tools that includes Cane Knives, Pruning Saws and Secateurs.
